**RE: DA 165-7-2005 Haerses Road Quarry - Maximum Extraction Depth Map Review and Revision**

Dear Whom It May Concern,

The Independent Environmental Audit for the Haerses Road Quarry was completed with the report submitted to the Department on 13 January 2020.

Condition 22(b) of Schedule 2 of DA 165-7-2005 requires Dixon Sand to undertake a review and update the Maximum Extraction Depth Map for the quarry within 3 months of the completion of the Independent Environmental Audit, to the satisfaction of the Secretary.

Dixon Sand engaged Mr Jason van den Akker from Golder Associates to undertake the review and update of the Maximum Extraction Depth Map.

The reviewed Maximum Extraction Depth Map and Letter Report are submitted as Attachment A for the Department's review and approval. I trust that this satisfies the Department's requirement.

Yours Sincerely,

A handwritten signature in black ink that reads "J. Hunnaman".

Hunny Churcher  
Environment Officer
