Dear Sir

RE: Cargill Irrigation Proposal

I refer to your letter to Council dated 27 July 2011, and advise you of the following:

1. The replacement of the berm with an interception trench along the southern and western edges of CFA low area would be sufficient to resolve Council concerns regarding the impact of the proposed development on flood waters and the capacity of the flood plain.
2. The implementation of the interception trench is adequate to satisfy the matters raised previously by Council in relation to water contamination.

Consequently, with the resolution of these issues listed above, Council no longer has any objection to the proposal for irrigation of the CFA low area.

If you have any further inquiries in relation to this matter please contact Steven Cook, Senior Town Planner, on 1300 292 442

Yours sincerely

Colby Farmer
Manager Development Services
