Certification.....	i
List of Tables	v
List of Figures.....	vii
List of Plates	viii
Glossary and Acronyms	ix
Executive Summary	ES-i
ES.1 Introduction	ES-i
ES.2 Property.....	ES-ii
ES.3 Project description.....	ES-ii
ES.4 Planning context and consultation	ES-iv
ES.5 Visual issues	ES-iv
ES.6 Noise assessment.....	ES-v
ES.7 Flora and fauna	ES-v
ES.8 Heritage.....	ES-vi
ES.9 Other	ES-vi
ES.10 Mitigation measures	ES-vii
ES.11 Project justification	ES-viii
1. Introduction	1-1
1.1 Background	1-1
1.2 Overview of the proposed modifications.....	1-1
1.3 Project location.....	1-2
1.4 Other developments at the general locality.....	1-7
1.5 Project participants and stakeholders	1-7
1.6 Context for the modifications	1-9
1.7 Outline of planning requirements and purpose of this document	1-10
1.8 Structure and content of this SEE	1-11
1.9 Contact details for further information.....	1-12
2. Property Details.....	2-1
2.1 Introduction	2-1
2.2 Woodlawn and Pylara properties	2-1
2.3 Wildlife refuges.....	2-1
2.4 Sally Trig Reserve.....	2-2
2.5 Mining titles overlapping the project area	2-2
3. Project Description	3-1
3.1 Approved Woodlawn Wind Farm project elements.....	3-1
3.2 Modified Woodlawn Wind Farm	3-3
3.3 Construction hours	3-9
3.4 Employment	3-10
3.5 Wind farm development phases	3-10
4. Planning Context and Consultation	4-1
4.1 Key planning considerations for proposed modification	4-1
4.2 NSW planning legislation	4-1
4.3 Applicable Local Government Instruments	4-2
4.4 State Environmental Planning Policies (SEPPs)	4-4
4.5 Other potentially applicable NSW Environmental Acts	4-5
4.6 Commonwealth legislation	4-7
4.7 Potentially applicable planning and EIA guidelines	4-8
4.8 Approvals for the Woodlawn Wind Farm project	4-10

4.9	Consultation	4-10
5.	Visual Assessment	5-15
5.1	Introduction	5-15
5.2	Overview of assessment.....	5-15
5.3	Wind farm visual characteristics	5-16
5.4	Landscape analysis.....	5-17
5.5	Landowner consultation	5-18
5.6	Visual Catchment of the wind farm	5-18
5.7	Visual impact assessment sites	5-21
5.8	Production of photomontages for selected viewpoints	5-22
5.9	Visibility assessment.....	5-23
5.10	Visual issues associated with ancillary works.....	5-26
5.11	Shadow flicker	5-26
5.12	Blade glint	5-28
5.13	Mitigation of visual impact.....	5-28
5.14	Conclusions.....	5-28
6.	Noise Assessment	6-1
6.1	Introduction	6-1
6.2	Supplementary SEE noise assessment 2010.....	6-2
6.3	Residential receivers.....	6-2
6.4	Background noise levels	6-3
6.5	Noise model predictions.....	6-6
6.6	Cumulative noise impact assessment.....	6-11
6.7	Construction noise	6-13
6.8	Mitigation measures	6-14
6.9	Conclusions.....	6-14
7.	Flora and Fauna Assessment.....	7-1
7.1	Introduction	7-1
7.2	Flora	7-1
7.3	Fauna	7-2
7.4	Conservation values.....	7-2
7.5	Assessment of potential impacts on flora and fauna	7-5
7.6	Mitigation measures	7-9
7.7	Conclusion	7-9
8.	Heritage Assessment.....	8-1
8.1	Introduction	8-1
8.2	Cultural background	8-1
8.3	Archaeological Assessment Indigenous Cultural Heritage	8-3
8.4	Impacts of the additional wind turbines.....	8-4
8.5	Mitigation measures to be included for the modified project.....	8-4
9.	Other Issues	9-1
9.1	Introduction	9-1
9.2	Traffic and transport	9-1
9.3	Telecommunications	9-7
9.4	Safety	9-11
9.5	Greenhouse gas emissions	9-11
9.6	Geology and Soil.....	9-13
9.7	Water resources and water quality	9-16

9.8	Socio economic impacts	9-16
9.9	Cumulative impacts	9-16
10.	Mitigation Measures.....	10-1
10.1	Introduction	10-1
10.2	Consent conditions.....	10-1
10.3	Existing Mitigation measures	10-2
10.4	Additional measures.....	10-2
10.5	Compliance reviews	10-5
11.	Project Justification.....	11-1
11.1	Overview	11-1
11.2	Additional Generation Capacity	11-1
11.3	Acceptability of Environmental and Social Impacts	11-2
11.4	Ecologically Sustainable Developments	11-3
11.5	Project Benefits	11-4
11.6	Conclusion	11-4
12.	References.....	12-1

Appendix A

Director Generals Requirements (Department of Planning, 2010)

Appendix B

Existing Consent Conditions

Appendix C

Property Details

Appendix D

Key Community Correspondence

Appendix E

- (a) Updated Noise Impact Assessment (Vipac, 2010)
- (b) Addendum Noise Impact Assessment (Vipac, 2010)

Appendix F

Flora and Fauna (Kevin Mills and Associates, 2010)

Appendix G

Heritage (Biosis Research, 2010)

Appendix H

Telecommunications (Lawrence Derrick and Associates, 2010)

List of Tables

Table 1.1 – LEPs relevant to the modified Woodlawn Wind Farm project
Table 1.2 – Proponent's other Australian wind farm projects
Table 1.3 – Structure and content of the supplementary SEE
Table 3.1 – Summary of specifications for turbine components for the approved wind farm and for proposed modification
Table 3.2 – Property details for wind turbine locations including the proposed modification
Table 3.3 – Approved wind farm infrastructure
Table 4.1 – SEPPS review in the previous assessments
Table 4.2 – Summary of potentially applicable NSW legislation reviewed in the previous assessments
Table 4.3 – Summary of potentially applicable Commonwealth legislation reviewed in the previous assessments
Table 4.4 – Stakeholders consulted as part of the planning process
Table 4.5 – Modified Woodlawn Wind Farm: Key stages of consultation
Table 4.6 – Issues arising from consultation undertaken to date and responses to issues
Table 5.1 – Landscape units (URS, 2004)
Table 5.2 – Wind farm components and key visual characteristics
Table 5.3 – Selected viewpoints for photomontage review
Table 5.4 – Details of viewpoint assessment sites
Table 5.5 – Visibility assessment results – representative viewpoints
Table 5.6 – Review of indicative visibility of Woodlawn Wind Farm for viewpoints from neighbouring residences within 3 km of the additional three turbines
Table 6.1 – Woodlawn Wind Farm Consent Conditions relevant to noise impact
Table 6.2 – Location of background noise monitoring sites
Table 6.3 – Representative background sites and sites with similar characteristics
Table 6.4 – Noise amenity criteria in dB(A) for each representative background site (SA EPA Guideline 2003)
Table 6.5 – Predicted noise levels (L_{Aeq}) for the receiver locations at integral wind speeds (m/s) (Vipac, 2010b)
Table 6.6 – Cumulative predicted noise levels (L_{Aeq}) for the receiver locations at integral wind speeds (m/s) (Vipac, 2010c)
Table 6.7 – Predicted noise levels (L_{Aeq}) at 8 m/s wind speed for wind farmers (non-relevant receivers)
Table 6.8 – Comparison of criteria and predicted L_{Aeq} level dB(A) at 8 m/s for relevant receivers updated to include the additional three turbines
Table 7.1 – Threatened species previously recorded in the local area (adapted from KMA, June 2010))
Table 8.1 – Indigenous heritage sites associated with the additional three turbines and associated route
Table 9.1 – Estimated traffic movements for the approved amended project with the additional three turbines
Table 9.2 – Estimated CO _{2-eq} emission saving for the modified project
Table 9.3 – Greenhouse gas emissions savings in context

Table 9.4 – General subsurface profile (URS, 2004)

Table 9.5 – Summary of soil landscape characteristics for the locality of the additional three turbines

Table 10.1 – Proposed revisions of the existing Conditions of Consent

List of Figures

- Figure 1.1 – Regional location plan
- Figure 1.2 – Locality Map
- Figure 1.3 – Project site plan
- Figure 1.4 – Boundaries of local government areas
- Figure 2.1 – Property plan
- Figure 2.2 – Wildlife refuges
- Figure 3.1 – Woodlawn Wind Farm layout with additional turbines
- Figure 3.2 – Wind turbine generator schematic diagram
- Figure 3.3 – Access tracks and cabling for the three additional turbines
- Figure 4.1 – Land zoning
- Figure 4.2 – Sydney Outer Catchment Area
- Figure 5.1 – ZVI - Hub Visibility of approved 20 turbines over proposed 23 turbines
- Figure 5.2 – ZVI - Blade Tip Visibility of approved 20 turbines over proposed 23 turbines
- Figure 5.3 – Classification of wind farm visibility
- Figure 5.4 – Shadow flicker analysis
- Figure 6.1 – Location noise receivers and representative background noise monitoring sites
- Figure 6.2 – Predicted noise levels contours (Vipac, 2010c)
- Figure 7.1 – Locations of the Endangered Ecological Communities for the project site
- Figure 7.2 – Potential water bird low level flight routes
- Figure 8.1 – Location of heritage sites
- Figure 9.1 – Traffic Access Routes
- Figure 9.2 – Radio transmitter sites and point to point links for the 40 – 999 MHz operational ranges
- Figure 9.3a – Map of radio link paths near wind turbines
- Figure 9.3b – Path profile Cowley hills to Gibraltar Hill
- Figure 9.4 – General Topographic variation and drainage for additional turbine sites
- Figure 9.5a – Site geology
- Figure 9.5b – Soil Landscapes

List of Plates

Plate 3.1 – External wind turbine transformers located at the base of the wind turbine

Plate 5.1 – Photomontage view to the west from intersection of Collector Road and Tarago - Bungendore Road

Plate 5.2 – Photomontage view from Taylors Creek Road looking east towards Woodlawn Wind Farm

Plate 5.3 – Photomontage view north from Taylors Creek Road adjacent to “Bonnie Doon”

Plate 5.4 – Photomontage view west from Glendale

Plate 9.1 – Turbine site 21

Plate 9.2 – Turbine site 22 looking south

Plate 9.3 – Turbine site 23 looking south
