**Subject:** Online Submission from Alexandra Morphett of Land Holder above proposed extension (object)

I would like to put on record my objection to Austar Coal Mine Pty Ltd's mining for coal under my property

Austar has not informed me about the cause and effects of the planned panel 5A Stage 2.

Many attempts have been made by my solicitor to meet with Austar over the last three months to discuss this panel. The mine has refused to contact my solicitor to organise a meeting.

I had hoped to share with Austar, the plans I have for the land covered by the A5a panel.

Please find attached the tourist development I have today lodged with Cessnock Council.

The development is planned for commencement in January 2011. Completion of the project is expected in late 2011.

I have read the application by Austar Coal mine to modify their DA 29/95 to include a panel 5A.

There has been no offer by Austar to meet the cost of legal representation and mining consultants to fully assess their documents.

It is obvious that the combined affect of mining LW A4, LW A5 and LW A5a will have a catastrophic affect on my residence, my grape vines, my dams and the creeks that run through my property.

The subsidence level predicted by Austar would put all present improvements on my property under water during the annual floods and all present improvements would be subjected to subsidence that would deem them as unsafe, unserviceable and unrepairable.

My proposed tourist development would be subjected to subsidence that would deem the property as unsafe, unserviceable and unrepairable. Flooding of the complex would occur annually.
