**Attention: Colin Phillips**

Dear Matthew,

**Re: Wallerawang Quarry – Modification to DA 344-11-2001**

Please find enclosed two copies of the *Environmental Assessment* relating to a proposed modification to the Wallerawang Quarry (DA 344-11-2001) and development application form. Electronic (pdf) files (<10MB) of the *Environmental Assessment* were provided with the original email notifying the Department of lodgement, however, these are also available on a USB card included on the inside front cover of each hard copy.

We have previously been informed that the Department will advise the Proponent of the development application fee on initial review of the *Environmental Assessment*. Once advised of the application fee, the Proponent will complete and sign the development application form (Sections 7, 8 and 10). I note that land owner consent for this application (Section 9) is not required by virtue of Schedule 1, Division 2, Clause 14 of the *Mining Act 1992*.

Along with the completed development application form, the Proponent will also complete, sign and submit a political donations form to the Department.

As requested, we have not advised or distributed the Environmental Assessment to any other government agency or public authority.

Should you have any questions about the documents, please don't hesitate to contact me in our Orange office.

Yours sincerely

Alex Irwin  
Senior Environmental Consultant
