Dear Mr Hanrahan

Sunrise Nickel/Cobalt Project

Following the meeting between Ms Helen Quade, Clean TeQ representatives, and Department staff on 11 May 2018, the Department requests that you provide additional information to assist in responding to the concerns raised by Ms Quade.

In particular, the Department requests that you:

1. provide clarification on the noise and air quality modelling undertaken for the project to date;
2. identify all predicted exceedances of relevant criteria air quality and noise criteria;
3. describe the measures that would be undertaken to verify whether air emissions and noise emissions are consistent with modelled data; and
4. outline in broad terms the monitoring that would be undertaken to ensure compliance with air quality and noise criteria.

I would appreciate it if you could provide this information by Friday 1 June 2018 so that the Department can finalise its assessment of Modification 4.

Yours sincerely

 14/5/18

Clay Preshaw
Director
Resource & Energy Assessments
