Dear Sir

RE: Modification 7 Boral Cement Works

Council has reviewed the documentation provided in relation to the proposed use of blast furnace slag in the operations at Boral Cement Works New Berrima. The main considerations for Council relate to:

1. Health issues in the use of the product - in this regard to comments of the OEH are noted and supported;
2. Stockpiling of the product - if this is to occur on site appropriate bunding and dust suppression measures are to be incorporated; and
3. Transportation issues and impacts on local roads and residents - should the trial progress to a full scale usage of the product in the production process, Council would like to be afforded the opportunity to comment on the transportation impacts.

In consideration of the above Council has no objection to the proposed trial of 3000 tonnes of the material proceeding.

Should you have any further enquiries please contact Peter Mitchell on (02) 4868 0888, Monday to Friday.

Yours truly,

Peter Mitchell
Environmental Assessment Team Leader
