Dear Ms Munk

AKF5 Tyre Derived Fuel Specification – Kiln 6
Boral Cement Limited – Berrima Plant - Environment Protection Licence 1698

I am writing in response to your email and attached documents dated 1 November 2022 to the Environment Protection Authority (EPA) seeking comment on an updated AKF5 Tyre Derived Fuel Specification (the specification) submitted by Boral Cement Limited (Boral). The EPA regulate the activities at the premises through Environment Protection Licence number 1698 (the licence).

Condition 3.20 of Boral's Department of Planning, Industry & Environment (DPIE) Conditions of Approval (CoA) states that for each Group 1 or Group 2 (AKF5) Non-Standard Fuel approved for use at the New Berrima premises a fuel specification is to be approved by the Planning Secretary & the EPA.

The EPA provided previous comments on a draft AKF5 specification in our letter dated 18 October 2022. The EPA has reviewed the updated specification documents provided by Boral and the majority of our previous comments have been addressed.

Boral's have advised that the AKF5 fuel will only be sourced from EPA licenced premises using retail sourced tyres that comply with the accreditation requirements for tyre collators under the Tyre Stewardship Australia Accreditation. Boral also confirmed that additional routine chemical analysis will be undertaken through pollutant tracking testing requirements under Condition 3.22 of the CoA.

Based on the information provided by Boral and the above comments, EPA has no objection to the proposed use of the AKF5 specification document. If you have questions regarding the above, please phone Matt Fuller on (02) 4224 4100.

Yours sincerely

A handwritten signature in blue ink, appearing to read 'Greg Newman'.
