**Re: Mt Owen Complex – Glendell Mine DA 80/952  
Health and Amenity Information Brochure**

Dear Lauren,

Schedule 4, Condition 3 of Development Consent DA 80/952 for Glendell Mine requires that:

3. *The Applicant must develop a brochure to advise landowners and/or existing or future tenants (including tenants of mine owned properties) of the possible health and amenity impacts associated with exposure to particulate matter, to the satisfaction of the Secretary. The brochure must be prepared in consultation with NSW Health, and be submitted to the Secretary within 6 months of the date of this consent.*

*The Applicant must review relevant human health studies and update this brochure every 3 years, to the satisfaction of the Secretary.*

*The Applicant must provide this brochure (and associated updates) to all landowners and/or existing or future tenants (including tenants of mine owned properties) of properties where:*

- (a) *the predictions in the EA (Mod 2) identify that the dust emissions generated by the development are likely to be greater than the air quality land acquisition criteria in condition 20 of schedule 3; and*
- (b) *monitoring results identify that the mine is exceeding the air quality land acquisition criteria in condition 20 of schedule 3.”*

In accordance with the above condition, Mount Owen/Glendell Operations seeks the approval of the Secretary to continue providing the NSW Health Factsheet 'Mine Dust and You' (2017) to relevant landowners and tenants in order to advise them of potential health and amenity impacts from particulate matter exposure. A copy of the NSW Health Factsheet is attached.

Please note, this fact sheet was reviewed and approved as relevant in September 2017. As a review is required every 3 years, we respectfully request that DPIE review the attached factsheet as still current and relevant (dated May 2017) to allow the continued distribution of approved public health information.

If you have any questions this letter, please don't hesitate to contact me on the details below.
