Dear Matthew

Mount Pleasant Coal Mine –DA 92/97 Modification 3

Thank you for the opportunity to provide comment in relation to the proposed modifications to the Mount Pleasant Coal Mine Modification 3 (DA 92/97).

It is understood the modification involves;

- A time limit extension of the mining operation to 22nd December 2026;
- Extension to the South Pit Eastern Out of Pit Emplacement.

Subsidence Advisory NSW has no objection to the proposed modifications.

The project needs to be aware of the proposed changes to the *Mine Subsidence Compensation Act 1961* which will require mining operators to directly compensate for subsidence damages that they cause to surface improvements.

If you would like to discuss this further, please don't hesitate to contact me by email at matthew.montgomery@finance.nsw.gov.au or by phone on 4677 1967.

Yours sincerely

Matthew Montgomery
Infrastructure Manager, Subsidence Advisory NSW
