Subject: RE: Mount Pleasant Coal Mine Mod 4 Exhibition Notice

Hi Tertius,

I have reviewed our mapping records and the proposed rail spur location is within close proximity to abandoned workings of an unknown depth.

It is Subsidence Advisory NSW's (SA NSW) recommendation geotechnical investigations are carried out to determine the extent of the abandoned workings and ensure the spur is constructed outside the area of possible influence or eliminate the risk of subsidence occurring through means such as grouting.

As the proposed rail spur is located within a mine subsidence district, SA NSW approval is required prior to construction.

Regards,

Matthew Montgomery
