Department of Planning and Infrastructure
GPO Box 39
SYDNEY NSW 2001

Attention: Mr.Howard Reed

Dear Mr Reed,

**RECOMMENDED CONDITIONS OF APPROVAL FOR s.75W MODIFICATION TO CALGA
SAND QUARRY (DA94-4-2004 Mod 1)**

Reference is made to your correspondence dated the 2 February 2012. EPA acknowledges the request to review the proposed modification under S.75W of the *Environmental Planning and Assessment Act 1979* ("EP&A Act") as applied for by Rocla Materials Pty Ltd.

On the 30 January 2012 EPA received The *Environmental Assessment for the Relocation of the Administration Centre* prepared R.W.Corkery Pty Limited and dated January 2012.

EPA understands that the proposed modification to the existing approval includes the relocation of the administration centre to a previously mined and now reclaimed area of the quarry site.

EPA has no objection to the proposed modification and provides the following comments. The EPA Recommended Conditions of Approval for this proposal are provided at **Attachment A**.

If you require any further information regarding this matter please contact Peter Mathews on (02) 4908 6804.

Yours sincerely

29 FEB 2012

MARK HARTWELL
Head Regional Operations Unit – Hunter
Environment Protection Authority

ATTACHMENT A - RECOMMENDED CONDITIONS OF APPROVAL FOR SECTION 75W MODIFICATION (DA 94-4-2004) BY ROCLA MATERIALS PTY LTD.

ADMINISTRATIVE CONDITIONS

Works to be undertaken in accordance with information supplied

1. Except as provided by these recommended conditions of approval, the works and activities shall be undertaken in accordance with the proposal contained in:
 - (a) The s75W modification application regarding DA94-4-2004 as submitted to the NSW Department of Planning and Infrastructure;
 - (b) The document "Environmental Assessment for the Relocation of the Administration Centre at the Calga Sand Quarry prepared by R.W.Corkery & Co. Pty Limited and dated January 2012.

unless otherwise specified in these conditions of approval.

OPERATIONAL CONDITIONS

Chemical Storage

1. All above ground tanks containing material that is likely to cause environmental harm must be bunded or have an alternative spill containment system in place.
2. All bunds must be impervious and sized to contain at all times 110% of the largest container stored within the bund.
3. All above ground tanks must be designed and constructed in a manner which prevents the ingress of rain or water into the tanks.
4. All tanks must be clearly labelled to identify their contents.

Erosion and Sediment Control

1. Stormwater at all areas of the premises which has the potential to mobilise sediment and other material must be controlled and diverted through appropriate sediment and erosion control and/or pollution control measures/structures to prevent the pollution of waters.
2. Sediment and erosion control and/or pollution control measures/structures must be maintained at all times to prevent the pollution of waters.

ABORIGINAL CULTURAL HERITAGE

1. In the event that surface disturbance at either demolition or construction sites identify a new Aboriginal object, all works must halt in the immediate area to prevent any further impacts to the object(s). A suitably qualified archaeologist and the registered Aboriginal representatives must be contacted to determine the significance of the object(s). The site is to be registered in the Aboriginal Heritage Information Management System (AHIMS) (managed by OEH) and the management outcome for the site included in the information provided to the AHIMS. Please also note that penalties now apply to corporations for failing to fulfil these requirements.
