## Submission for: Minto Resource Recovery Facility

### Objects

# ***Name Withheld***

MINTO, New South Wales

## Message

I will oppose your planned recovery facility close to our company.

## Submission for: Minto Resource Recovery Facility

### Objects

# ***Name Withheld***

ST ANDREWS, New South Wales

## Message

This facility will be literally behind our house and right next door to a chemical facility. Has the Trustee for Minto Property Trust considered the decline in property value, will the "Trustee" compensate current land/home owners? Has there been any consultation with the whole community re the potential health risks associated with a Resource Recovery Facility so close to thousands of homes, schools and shops. Has there been any environmental impact studies? if so, what were the results. Will these be made public. What will be the impact of increased traffic on the already over congested roads in the area (has anyone seen Raby Road car park lately).

Construction and Demolition Waste? Will this include harmful substances (eg, asbestos)?

So many unanswered questions. Will we get answers? Should we sell up and move now and let some other sucker live here.

Looking forward to some answers.

Thanks and regards
