Hi Patrick,

Jemena has reviewed the location of the SSD Application (SSD-82052708) and undertaken a review of the documentation available.

Jemena would like to note that it has a high-pressure Secondary gas main surrounding the proposed site area, running in road reserve along Wood Street, Loyd Rees Drive and through Blackman Park approximately 50-100m from the proposed data centre.

As a result, provided all proposed works are confined to the lot boundary of 12 Mars Road, Lane Cove West, NSW, 2066 (Lot 22/ DP732062), Jemena do not anticipate any impacts to any Jemena assets surrounding this location.

Jemena has no objection to this SSD application.

Ensure appropriate Before You Dig Australia (BYDA) processes are followed as part of the construction process.

Thank you

Regards,

Farrah Albermani
Lands Management Officer
