I wish to make a submission regarding the Concept & Stage 1 – ANZAC Village Seniors

Housing (SSD-85869467). I came to live in this village to live a safe and friendly life at the end stage of my life. My family have grown up and are living their own life and I needed a place where I could access independent living with help, on going medical and exercise services.

It is this part of the development which worries me. I use the TLC which provides pool, gym and medical Services. When I first came to the village I could access these facilities outside the village but as I am getting older it is VERY important that these facilities are readily available close to home.

In Stage 1 the swimming pool is to be updated and moved from its present address. Please make sure the new pool is fully functioning before the old pool closes.

The other worry is access via roads to get in and out of the village. Colooli Rd should not be used by heavy trucks. This should be monitored with consequences.

The comfort and safety of all the residence should be a main concern and contingency for emergency should be in place from the beginning, things like loss of power, water outages. The ambulances often have to come to the village and roads should be kept free for them.
