

Attachment 1: KEY ISSUES

Traffic and Parking Management Plan

A Traffic and Parking Management Plan (TPMP) is required which details the measures to safely manage the daily transport to/from the respective school campuses.

Traffic management measures that need to be addressed include:

- vehicle pick-up/drop-off management and orderly vehicle queuing;
- maintaining bus accessibility and student waiting areas;
- safe parent and student behaviour during pick-up/drop-off; and
- safe pedestrian movements to the school entrances, minimising vehicle-pedestrian conflicts.

The TPMP must also detail the responsibilities of various personnel executing the plan and include measures to monitor, review the performance and make improvements to the plan.

Residential amenity

Further information is required regarding the design of the acoustic wall proposed to be installed along the sensitive areas at the junior school campus as identified in Appendix W of the EIS. Details of the specific location, dimensions and materials of the acoustic wall are required.

Amended landscape plans and architectural plans must be provided that include the details of the proposed acoustic wall.
