

Your ref: SSD6236 Eastern Creek Energy from Waste Facility

Attn. Manager Industry Assessments

To whom it may concern

I am writing on behalf of myself and my family who reside approximately one kilometre from the proposed Energy from Waste facility. We object to this proposal which we believe should not be constructed in such close proximity to a residential area.

Our primary concern is for our son who is an incomplete quadriplegic and subsequently suffers from reduced lung function, any impact on air quality would be highly detrimental to our health and quality of life. Toxins and any other hazardous materials will naturally settle around Ropes Creek and as our sons condition was caused by an unforeseen side effect of chemotherapy we believe any further exposure to toxins would be detrimental no matter how slight.

We are also concerned that the odours caused by the proposed seven day stockpile of waste and the exhaust stacks would cause a significant reduction in property values and curtail our ability to enjoy outdoor entertainment.

Once again we wish to express our objection and hope that it is decided that this is not the right site for such a facility.
