

Dear Sir,

Thanks for your letter ref "exhibition of Modification Request for Cultural Events site, North Byron, Parklands, Yelgun (MP09_0028 MOD 3).

I am living in [REDACTED] where all Parkland's fest noise and decibels nuisances are very high. I must say that when I was here enduring the unacceptable degree of loudness, bass, decibels, I fell sick and had to go to doctor.

I bought this place for its beauty and quiet environment, just nature park reserve bording it..... but, oh, Parkland came in the game and it was the end of the calm and serene surroundings.....

I read that Parklands want to increase the level of decibels and bass..... And I do hope that you will not let that happen. (just for the sake of a couple of greedy investors), and you will prioritise the well being of the majority of the population around.

All the community around has been quite disturbed mainly by the noise (up to Mainarm, Billinudgel, South Golden beach, New Brighton, and all of Ocean Shores where most of the inhabitants are respectuous of neighbour's space - hearing and visual.)

Without counting the disastrous effects of these fests on the nature, wildlife, and even human life (deaths by overdose).

This site is really improper for that kind of "cultural events", and I do hope that you will not renew this aberration of letting that happen.

I Came to the Shire thinking to be in a different kind of spirit environment, but unfortunately, we have to struggle all the time to keep our space free of devastating consequences;

There is already other fest sites which are more proper, so I trust that this one will get closed.

Thank you.

Danielle Levis
Barrister
