2586	Australia	21/09/2015	They will have a huge impact on our quality of life and destroy the vistas around our village
2582	Australia	21/09/2015	"IWT are dividing rural communities, industrilising our countryside & are not capable of providing reliable base load power. There are better options available to clean power that involve getting all Australians to contribute."
26133	Germany	22/09/2015	Stop the Animal abuse
2615	Australia	22/09/2015	I believe there are many medical issues caused by the wind turbine. They are noisy and any if any real benefit out weighed by noise and health.
2582	Australia	22/09/2015	I have concerns regarding the impact on wild life.
2581	Australia	25/09/2015	I am the owner of a property located within 1.6km of the nearest proposed turbine. I am concerned about the negative inpacts on the environment during the construction phase and the change from the current rural character of the area after completion of the project.
2586	Australia	25/09/2015	"I am greatly concerned about the hindrance that turbines would have on aerial support for fire fighting, the lack of knowledge regarding health issues and the drop in land values that these turbines would bring."
2582	Australia	25/09/2015	"I live within 2 ks from these and will loose property value from the bush distrustion and visual aspect they look horrible ,not to mention the health side "
2582	Australia	26/09/2015	"I am signing this petition because the areas proposed for this windfarm are NOT industrial and this beautiful rural area has much wildlife, including several endangered species including the nesting habitat of the Sulerb Parrot which should not be disturbed."
3350	Australia	26/09/2015	The wind industry stinks
2072	Australia	26/09/2015	I'm signing because I have witnessed the injustice put upon the Upper Lachlan Shire residents by the Gullen Range Wind Farm developers and the Department of Planning and Environment.
4888	Australia	27/09/2015	I live 450 mtrs from the closest turbines at Windy Hill in FNQ do not want to see others suffer as I am
5418	Australia	27/09/2015	There have been to many rural communities destroyed by these WTGs already there is no sensible reason to build any more.
2039	Australia	27/09/2015	Wind farms are not the answer for the beautiful region.
2031	Australia	28/09/2015	wind farms are destroying and dividing our districts and may be effective but not in this district due to the proximity to habitation and wildlife
2582	Australia	30/09/2015	"I am so opposed to the wind turbines Bushland is destroyed Habitat will be destroyed of 2 endangered species Superb Parrot and Southern Pygmy Loss of our chosen quiet rural lifestyle Not good for economy or environment I wonder if \$400 would be better spent on Govt buildings using solar panels Wind turbines are noisy inefficient and devalue the land "
2906	Australia	1/10/2015	Wind farm are an inefficient and ineffective waste of taxpayer funds and they destroy Australia's beautiful landscapes. Green tokenism gone mad!
2798	Australia	1/10/2015	Wind Farms achieve none of the environmental goals they once claimed. All about harvesting subsidies not wind.

2583 Australia 1/10/2015 "I live in Rugby/Rye Park area, NSW & will be impacted immensely by these monsters which are funded by an overpriced Labor & Greens RET system by us-the Aussie Tax-payers Corrupt foreign Wind outfits looking for a profitable free buck at Australia'n power consumer expense & the political thugs promoting them-They are heavily investment backed by current Labor Unions & the Greens money with large & profitable tax-payer kickbacks for their political parties & their greedy land hosts. They divide their local communities without thought to the neighbors/smaller landowners who end up affected by them- Increased & greater Bushfire risk to homes around them, land & home depreciation to others homes around them, noise, lack of repairs after installation, faults. health related issues, the very high subsidized cost by Australian taxpayers for many years to come & sky-rocketing power costs to all us This is & will be the legacy of 'Wind Turbines' in Australia-Nothing more than 'Tax-payer funded Scam by Government Politicians, Foreign Wind Outfits & greedy rural landowners in Australia."

47327 United States 1/10/2015 "They are trying to put 2 wind farms in around my home and my childhood home . These are going to be through 3 counties here in Indiana, we are fighting hard against them!!:"

7009 Australia 2/10/2015 "Wind turbines are terrible to live near... my family and I lived only 500metres from massive wind turbines, and I can tell you that they are noisy and they will made us sick. "

2582 Australia 5/10/2015 "Uneconomic,unsightly,noisy, health riskand do not save green house gasses"

2582 Australia 5/10/2015 "I am signing this petition because:

1. wind turbines should not be located in areas of high population

2. Solar should be used as it has the greatest potential to become more efficient over time as technology develops.

3. Turbines should not be placed on farmland as farmland should be mainly used for farming

4. The Yass area is prone to bushfires. Turbines will limit the ability to use aircraft to control major fires which will result in destruction of farm resources."

2582 Australia 5/10/2015 "I'm opposed to the placement of unsightly, inefficient,non cost effective turbines that can become an extreme fire hazard "

2650 Australia 5/10/2015 I think they're unnecessary

2582 Australia 5/10/2015 "affect on surrounding people and properties health ,views, values and ability to manage farms without interruption."

2070 Australia 10/10/2015 "Wind farms are destructive of the environment, killers of birds and bats.

Their production strengthens the Chinese economy at our expence. In their working life they will not generate as much energy, as was used, through coal, in their production."

6009 Australia 10/10/2015 "A wind turbine during its working life generates less energy than was produced by the burning of coal and other carbon sources (something like 400 tonnes for smelting steel and making concrete) used in its manufacture. Windmills are a boon to industry in China. Here they despoil the landscape, kill bats and birds, including eagles that come for the carrion, and make life unbearable for people living nearby."

2617 Australia 13/10/2015 The windmills will be placed close to our property. The noise will effect our rural stock which brings on the income for the farm. We say No to the wind farm!!

2586 Australia 15/10/2015 "I object to the development of wind farms at Rye Park as they are a gross intrusion on the beauty of the place. The hills around Rye Park and the ambience of the community is lovely & peaceful and wind farms will totally destroy the views and put the visual focus on the turbines rather than the beauty of nature. I walk those hills and observe kangaroos, echidna and wombats in their natural habitat and the introduction of wind farms will restrict access and prevent my and other people natural enjoyment. There is a sunset phenomena at Rye Park whereby the setting western sun creates a rising shadow line on those hills, the more it sets the higher the shadow line until the very tips of the hills are illuminated by the sun. I love this natural effect and should wind turbines be introduced my final glimpse of that phenomena will be replaced by ugly and unsightly man made turbines. What a travesty on the beauty of Rye Park. I strongly oppose the introduction of wind turbines anywhere along that line of hills between Rugby and Rye Park. "

2099	Australia	15/10/2015	our farm is in this area and from the research i have read which has come from government papers - is that it has not been proven safe for wild life and farm animals living where the wind farms are from the flickering in the light and humming. It also causes a disturbance in radio and tv waves and will change the landscape of our farm - which is what i go there to seek.
2582	Australia	18/10/2015	i am passionate about this
2582	Australia	18/10/2015	cause ftp
2582	Australia	18/10/2015	because this is a problem and their are plenty of other areas where can do this were no one is living
2582	Australia	18/10/2015	Im signing because its bad for the farmers and environment...
2582	Australia	18/10/2015	For a good cause
