Protecting our Heritage Horses

6/11/2019

To whom it may Concern

Thank you for taking time to accept our Endorsement of Noeline Franklin's B. Sc. (Hons) PTC M. Med. Sc., Submission sent to your Department, on the proposed Snowy Hydro 2 Major Project.

We have read and concur with her sentiments and research, throughout. We are in support of her Submission. We do not support the dumping of rock into Tantangara (2,800,677cubic metres) and Talbingo (2,834,212 cubic metres) Reservoirs as well. We do not support the changes in Hydrology and degradation by earthworks and construction in an already impacted environment, a UNESCO Biosphere.

We feel that there are many issues that need addressed throughout the EIS, and follow that there will be too much environmental degradation, as addressed in Noeline Franklin's Submission that we concur with her concerns. This letter goes hand in hand with her Submission.

We agree that the resultant changes for the environment that have occurred as a result of Snowy Hydro 1, will be amplified as a result of Snowy Hydro 2. Let's not blame it on the Brumbies, but place it on where the blame belongs.

We agree with sustainable energy production, but feel that the impact on such a sensitive and unique environment it is being implemented in the wrong place. We do not support the Works of Snowy Hydro 2 as detailed in the EIS. We do not support implementation of the Scheme at all.

Yours Sincerely

Julie McGoldrick  
President
