Planning & Assessment
Department of Planning Industry and Environment
Locked Bag 5022
Parramatta, NSW, 2124

Dear Director,

APPLICATION NUMBER: SSI_8863

With respect to the WESTERN HARBOUR TUNNEL AND WARRINGAH FREEWAY UPGRADE I wish to notify you, as a resident of NSW, that I **OBJECT** to this project because of the effect that this project, in its current form, may have on mine and my husbands health, because as residents of Moodie Street, Cammeray, (the street closest to the Warringah expressway on the west side of the expressway)we will be exposed to toxic pollution from **UNFILTERED VENTILATION STACKS**.

Both of us suffer from respiratory complaints and it is reasonable to predict we could be vulnerable to the result of a significant increase in air pollution resulting from five years of construction work and most importantly the permanent pollution arising from the use of said **unfiltered ventilation stacks**

Given that Cammeray is an area where a relatively high percentage of the residents are older people many of whom suffer from medical disabilities, this project most certainly will produce negative effects on other residents living environment and their health **PARTICULARLY IF THE AIR FROM THE VENTILATION STACKS IS NOT FILTERED**.

Respiratory medical specialists also are on record warning that **young children from the many schools in the surrounding area**, are at risk of developing **severe respiratory diseases** if forced to inhale toxic exhaust particles arising from **unfiltered ventilation stacks**. There is now sufficient scientific evidence available from climate experts and the medical profession regarding this matter. **to enable your department to advise the Government that the health of constituents has a higher priority than increased cost factors.**

Yours sincerely
