Subject: Objection to Western Harbour Tunnel (30/3/2020 5.31pm)

Please note that I was unable to log in to the designated website after successfully registering. I was advised to quote: Mon Mar 30 06:22:59 UTC 2020

I strongly object to the current plan for this tunnel based on (not exhaustive):

1. Thousands of tonnes of toxic sludge containing cancer-causing chemicals will be released up from the bed of Sydney Harbour (ref. Dr Bill Ryall – leading environmental consultant); and
2. Far preferable alternative route involving relocation of Yurulbin Point coffer dam and under Snails Bay & Birchgrove Park (ref. Lindsay Anderson submission)

Thanks & Regards
Debra Hazelton
