Re: Project (SSI-8863) – The use of Berrys Bay as a temporary construction site for the Western Harbour Tunnel.

I object to the use of Berrys Bay for this project because of the harm it will cause to the owners and residents of this bay. During the construction, use of the site and its remediation, residents will be subjected to unacceptable levels of noise, visual pollution and fumes. This will continue over a predicted period of five years operating 24 hours/day, 7 days/week.

As the owner of [REDACTED] since the early 1990's, I was not notified of this proposal in an expected manner. I was until recently of the impression that this development was occurring elsewhere. I also had great difficulty finding a website which gave some information.

Over the years I have had a variety of tenants, some longer term some shorter term. How would the occupants with three small children have coped? The attraction of Berrys Bay to most tenants is its beautiful outlook and peaceful ambience. What tenant will want to sit on the balcony opposite a noisy construction site, and be kept awake all night?

I have recently had my property refurbished. The project was lengthy, expensive and exhausting, but was necessary. As a retiree, this property provides a major part of my income. Regardless of how little rent it attracts, my expenses: rates, levies etc will continue.

This proposal is unsatisfactory for all concerned.

Yours Sincerely,

[REDACTED]
Carolyn Willis
