Walsh<sup>2</sup>  
Analysis

SMCSWSPS-W2A-OSS-PL-REP-000002

**NSW Department of Planning, Industry and Environment**

This report has been prepared in response to the requirements contained within the The Department of Planning, Industry and Environment (DPIE) Response to Submissions (RtS) Dated 8th July 2020. Specifically, this report has been prepared to respond to the DPIE requirements summarised in Table 1.

Department of Planning, Industry & Environment	(a) Demonstrate compliance with Condition B3 of the Concept Approval, and provide detailed illustrations showing how the proposed built form satisfies the following subclauses: * (e) a varied setback from the Pitt Street boundary of the site, with the articulation of built forms be designed to minimise solar impacts to the living rooms of Princeton Apartments
Department of Planning, Industry & Environment	(b) Provide additional shadow analysis of the proposal's overshadowing impact on the Princeton Apartments. This must detail the amount of solar access (nil, 0–30 minutes, 30–60 minutes, 60–90 minutes, 90–120 minutes and >120 minutes) the dwellings within Princeton Apartments would receive between 9am and 3pm, 21 June (existing and proposed). Any discrepancies between the number of dwellings maintaining solar access between the Concept Approval assessment and the proposal must be clarified.
Department of Planning, Industry & Environment	(c) Review the appropriateness of the proposed projections beyond the approved building envelope with respect to any additional impacts when compared to a complying development, including further consideration of any: * overshadowing impacts to adjoining residential properties
Department of Planning, Industry & Environment	(f) Demonstrate consistency with Design Guidelines (clause 4 (Built Form above the Podium)), which requires the proposal to minimise overshadowing impacts on adjoining residential development and Hyde Park. This shall include illustration of design options considered and their potential benefits and impacts.
Department of Planning, Industry & Environment	Review and revise the proposal with respect to compliance with SEPP 65 and the Apartment Design Guidelines (ADG) (as required by Condition B3(h) of the Concept Approval), including further consideration and illustration of: * apartment design, size and density to meet solar access criteria.

Memo regarding Solar Access Review of Pitt Street South SSDA & Princeton Apartments

We undertook a full Solar Analysis Report for The Pitt St South Overstation Development regarding the Apartment Design Guide (ADG) Objective 4A-1, as well as its impacts to adjoining residential properties regarding ADG Objective 3B-2. This letter provides an update to our report dated 15 May 2020 Revision C, based on a recently supplied model and drawings from Bates Smart, with the model named "PSS\_POST RTS DD MODEL FINAL.skp" sent on the 26/08/2020.

Further to the revised scheme, we have also been asked to expand our analysis to a minute by minute analysis instead of the half hourly Solar Access Table that was shown in the Revision C Report in Appendix C & Appendix D.

We have looked at the effect of any changes to the Response to Submission Modification with respect to Princeton Apartments and the SSDA site. We also looked at possible changes to a unit on the South West of the building.

Overall, there is a minor increase in solar access to Princeton Apartments due to the South Western unit now having its articulation within the Approved Concept Envelope. There is no change the SSDA solar access between 9am and 3pm; however there has been a slight reduction in the numbers for 8am to 4pm due to the living room window in the South Eastern unit being recessed into the building.

## 1. SOLAR IMPACTS TO PRINCETON

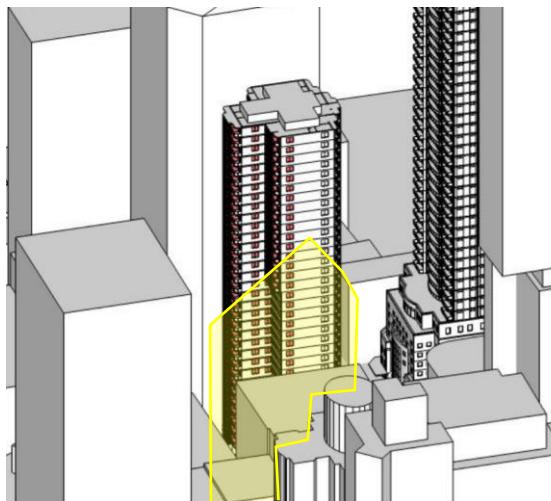

### 1.1 EXISTING COMPLIANCE

It has been noted that our Solar Analysis was different to the Stage 1 Solar Access Report by Steve King. Below we have created a comparison table to highlight the differences (all based on 116 units).

	Complying 9-3	Complying 9-3 Percentage	No Sun	No Sun Percentage
Existing Princeton - Steve King Report.	62	53.4%	17	14.7%
Existing Princeton - Walsh Report.	54	46.6%	19	16.4%
Proposed Princeton - Steve King Report.	5	4.3%	17	14.7%
Proposed Princeton - Walsh Report.	6	5.2%	31	26.7%

Firstly we reviewed the Methodology of Steve King as outlined in Part 5.1 and note it is an identical methodology to what we have used as outlined in part 4.2 of our report. We have also reviewed the characterisation of overshadowing is outlined in Part 6.2 of the Steve King report, which references objective 3B-2 of the ADG. Our characterisation is also outlined in part 6.2 of the report and is the same.

We have reviewed the old report and we note that there are many external factors that lead to the differences in the results of Steve King verse Walsh<sup>2</sup> Analysis. The main external factor that leads to this difference is the Development Application Approval of 116 Bathurst Street Sydney; which has been included in our analysis but not in Steve Kings report (possibly not approved at the time). The two below images demonstrate some of the impact this approval has on Princeton Apartments, with a significant increase to overshadowing to Princeton Apartments.

1030 Existing View from Sun from Stage 1 DA

1030 Existing View from Sun from Walsh2 Analysis Report

Based on the above, the existing ‘base case’ analysis of Princeton Apartments as noted in Table 2, part 6.3 of our SSDA report are the existing numbers that should be referenced as they include the Development Application Approval of 116 Bathurst Street.

Further to the above, we have now undertaken a minute by minute analysis on Princeton Apartments as shown in Appendix A of this Memo. It is important to note that actual solar access onsite may differ from the values shown due to external factors such as the basic 3D Massing Model as supplied by the City of Sydney.

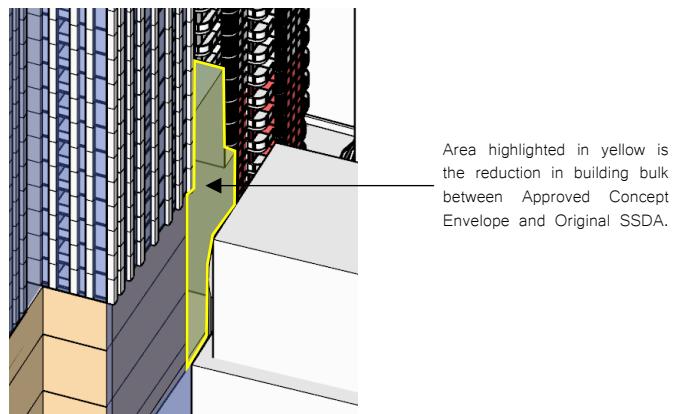

It is worth noting that the design of Princeton Towers itself does not maximise solar access. The design places living rooms facing east and west, with bedrooms on the northern façade. This fact, coupled with the unit that is on the south side of each floor which doesn't receive winter sun means this building has poor solar access prior to any redevelopment around it.

## 1.2 APPROVED CONCEPT ENVELOPE COMPLIANCE VS ORIGINAL SSDA

When looking Princeton Apartments in a minute by minute analysis it is noted in Appendix A that overall there is an improved solar access to Princeton for the original SSDA compared to the Approved Concept Envelope. A summary of Appendix A is that 19 apartments receive increased solar access by 8-30 minutes, whilst 9 units lose 3 minutes of solar access. Overall it means that apartments in Princeton Apartments receive a gain of 248 minutes of solar access, with a loss of 27 minutes; equating to a net gain of 221 minutes of solar access with regards to the Original SSDA compared to the Approved Concept Envelope.

The gain in solar access is attributed to two main factors:

1. The Original SSDA application has a much larger setback in the first 9 stories than what the Approved Concept Envelope allows. This is demonstrated in the below image

2. The open South Eastern Corner as sun penetrates through the gaps in the balconies in comparison to the Approved Concept Envelope.

The loss of 3 minutes to the 9 units is due to the western face of the Original SSDA protruding beyond the Approved Concept Envelope towards the Pitt St setback.

Overall, the original SSDA has improved the solar access outcome of Princeton Apartments by increasing the overall compliance by 221 minutes compared to the Approved Concept Envelope.

### 1.3 ORIGINAL SSDA Vs RESPONSE TO SUBMISSION MODIFICATION

The Response to Submissions model has made the following amendments which further the improved solar access to Princeton Apartments:

1. The western façade articulation depth has been reduced to be within the Approved Concept Envelope
2. The South Eastern balcony has been reduced in width.

Based off the above, a new analysis has been undertaken and is now located as Appendix B of this memo.

The reduction in the façade articulation depth now means that all 9 units that lost 3 minutes of solar access now have no reduction in solar access in comparison to the Approved Concept Envelope. Appendix B now demonstrates this.

The reduction in the balcony width does not have any impact on the solar access to Princeton Apartments due to the angle of the sun resulting in the building overshadowing windows rather than the balcony projection.

Overall, the Response to Submission Modification results in an improved solar access of 263 minutes to Princeton Apartments compared to the Approved Concept Envelope.

## 2. RESPONSE TO SUBMISSION MODIFICATION

### 2.1 MINUTE BY MINUTE ANALYSIS

Prior to undertaking any revised analysis of the Response to Submission Modification, we were asked to expand our table of solar compliance to be minute by minute analysis instead of the half hourly intervals. A new analysis is included in Appendix C which demonstrates this minute by minute analysis for the Original SSDA. We note that the overall compliance numbers are slightly different to the Revision C report submitted with the Original SSDA as a minute by minute look at the building is more accurate than a half hourly analysis. The revised solar access numbers are noted below.

Comply for Living + POS 9-3	Comply for Living + POS 8-4
117	124
50.0%	53.0%

### 2.2 POSSIBLE CHANGES TO SOUTH WESTERN UNIT

We were asked to investigate any solar access changes if the SSDA had an increased the setback to the South Western unit from Pitt Street. We found that the result had a small improvement to Princeton Apartments, but a loss of complying solar access to the SSDA. Our detailed analysis is below.

A setback to the South Western Unit on all levels of the original SSDA model was investigated. This would increase the amount of solar access to 1 unit on each level from Level 9-25 by a maximum of 7 minutes. This setback is not useful for living room solar access compliance to the units from level 26-41 as all units have their living rooms facing East and only bedrooms facing West.

The consequence of this setback is that the applied to the original SSDA would lower the ADG compliance of the original SSDA by 20 apartments, which would take its compliance from 50.0% 9-3 down to only 41.5%.

It is also noted that as part of the Concept Approved Envelope, in the Response to Submissions, that Walsh<sup>2</sup> Analysis undertook further setback analysis on this western frontage for Sydney Metro (document [linked here](#)). At that time, the Department of Planning and Environment was requesting an 8m setback to all of Pitt Street.

The resulting analysis was that for a full building setback to 8m, the gain in solar access to the 16 units would only increase by 12 minutes.

We believe the benefit to Princeton of 7 minutes of solar access to 27 units is not worth lowering the compliance of the SSDA from 50% down to 41.5%. We advised the client to instead to pull the façade back into within the Approved Concept Envelope, which would increase the solar access to those 27 units by 3 minutes.

### 2.3 CHANGES TO SOUTH EASTERN BALCONY

As noted in part 1.3 of the memo, the change to the South Eastern Balcony does not result in any change to the solar compliance of Princeton Apartments.

The Revision C Walsh<sup>2</sup> Analysis counted three of these units; however, the model changes between the revision of model that was used for the original SSDA analysis verse the model that was actually submitted for the SSDA has the glazing change locations on the living room. This change means these three units do not comply in the Original SSDA, which can be seen in the more detailed analysis in Appendix C.

There is no change to compliance of the SSDA or Princeton between 9am and 3pm.

#### 2.4 UPDATED SOLAR COMPLIANCE OF RESPONSE TO SUBMISSIONS MODIFICATION

Compliance with Objective 4A-1 of the ADG is below for the Original SSDA. This summary has been extracted from Appendix C; where compliance was updated to a minute by minute analysis.

Comply for Living + POS 9-3	Comply for Living + POS 8-4
117	124
50.0%	53.0%

An updated compliance with Objective 4A-1 of the ADG is below for the Response to Submissions SSDA. This summary has been extracted from Appendix D.

Comply for Living + POS 9-3	Comply for Living + POS 8-4
117	122
50.0%	52.1%

There is a difference in compliance between the original SSDA and the Response to Submissions Modification is due to the change to the south eastern unit during extended hours.

Overall, both the Original SSDA and the Response to Submissions Modification both maximise Solar Access to the site for the following reasons:

- There are no single south facing units
- All units on the east have living rooms & POS on the façade line; therefore, maximising solar access.
- All units on the west have living rooms & POS on the façade line; therefore, maximising solar access.
- All units on the north have living rooms & POS facing north; therefore, maximising solar access.

The architects have attempted to maximise solar access to the building.

Yours Sincerely,

Scott Walsh  
Registered Architect ACT 2624, NSW 10366

Walsh<sup>2</sup> Analysis
