Re: Proposed Bowdens Silver Project, LUE, N.S.W.

Thankyou for allowing me to lodge this VERY strong objection to the above proposal.

THIS Company should NEVER BE CONSIDERED OR ALLOWED to begin operations. THESE MINES should NEVER BE considered so dangerously close to any communities.

REASONS FOR THIS STRONG OBJECTION FOR ENTIRE AREA.

- A) NOISE, TOXINS EMITTED IN FINE DUST PARTICLES, PROPOSED WATER USAGE.
- B) SOIL + SITE CONTAMINATION, NO ENVIRONMENTAL CLEANUP OF SITE, EROSION, SINKHOLES.
- C) LARGE TRUCKS + TRAFFIC TO MUDGEE.
- D) DESTRUCTION OF PEACE AND LANDSCAPE ENVIRONMENTS.

RESULTS OF THE ABOVE

- A) Given the, the community will be subjected to serious health and environmental problems.
- B) THE WIDER population in the area will be destroyed by this mine, both in property values, agricultural farms and their stock numbers + requirements, WATER DESTRUCTION.
- C) SILVER, LEAD & ZINC MINES should be sited a long long way from townships and establish agricultural farms.

I grew up in the Mudgee region. This is an inappropriate mine in an inappropriate place. A disastrous decision if this was to ever go ahead.
