Reason / Comment:

This project has numerous merits as follows:

- The project has taken the necessary steps to be assessed for environmental and sustainability impacts
- This project with its enormous supply of ore (~200+ million tonnes) makes it a strategic national asset
- This project offers numerous characteristics to put it ahead of other applicants
- In terms of investing in an asset of the future → Silver has anti-viral use as well as renewable energy
- Silver is one of the most valuable and "under-valued" assets in the world... the success of this mine has the potential, with its massive supply of ore, to create a wealth effect not only for the business itself, but the residents of Mudgee, the State of NSW and the country as a whole.
