Reason / Comment:

I support the project for many reasons. These include the economic benefits to the local, state and national populations and the government via tax revenue. I also support it because silver is a very important commodity to our future. It is widely used in technology and renewable energy (solar panels). It is the element that is included in more patents than any other element due to its incredible qualities. Silver is usually mined as a by product, but this is a primary silver mine. This is important because in a deep recession silver supplies may contract due to mine closures even if silver prices are high. In a recession silver prices usually go up and this means the project will help the community when it needs it most (during recessions). I hope you approve this important project.
