

Mr Nigel Little
NSW IMS Manager
Colas New South Wales Pty Ltd
Unit 2, 3-5 Gibbon Road
Winston Hills ACT 2153

09/12/2021

Dear Mr Little

**Tomago Asphalt Facility – Modification 1 (MP07_0031-Mod-1)
Request for Response to Submissions**

The exhibition of the modification application including the Modification Report for the above proposal ended on Tuesday 7 December 2021. All submissions received by the Department of Planning, Industry and Environment (the Department) during the exhibition of the proposed modification are available on the Department's website at:

<https://www.planningportal.nsw.gov.au/major-projects/project/40656>.

The Department requires that you provide a response to the issues raised in all submissions by 1 February 2022. You are also requested to submit additional information that addresses the issues identified in **Attachment 1**. Please note that not all agencies have provided comments to the Department at this stage and these will be forwarded once available and will be required to be responded to.

If you are unable to provide the requested information within this timeframe, you are requested to provide, and commit to, a timeframe detailing the provision of this information.

Please lodge your response by progressing the application on the major projects planning portal <https://majorprojects.planningportal.nsw.gov.au/>.

If you have any questions, please contact Jeffrey Peng on (02) 9995 6685, or via email at jeffrey.peng@planning.nsw.gov.au.

Yours sincerely

Chris Ritchie
Director
Industry Assessments

as delegate for the Planning Secretary

Attached: ATTACHMENT 1 - Department's Comments

ATTACHMENT 1

Department's Comments

Odour

1. The Department notes that rubber smell from the asphalt plant has been cited as a concern by the public, consistent with the observation reported in the audit report submitted as part of the modification application. It is requested the Applicant provide the following information in the RTS:
 - a. sources of odour generation, including clarification around the potential for crumb rubber asphalt fumes to impact neighbouring sensitive receptors
 - b. quantitative comparison of odour and air quality impacts between the original approval, current operation and proposed modification
 - c. any required odour management and mitigation measures.

Input materials used for asphalt production

2. It is requested the Applicant provide a detailed comparison of input materials used for asphalt production between the original approval, current operation and proposed modification.
