Dear Brent,

SCEGGS DARLINGHURST - Wilkinson House SSDA – Level 3 Rooftop Planter

The Level 3 rooftop planter has been designed with a 550mm soil build-up as a response to the restricted loading capacity of the terrace. The *Melaleuca linariifolia* 'Snow in Summer' is a smaller variety and survives well in a shallow rooted environment. It will be viable, provided appropriate irrigation and regular maintenance & monitoring is implemented. Furthermore, the available soil depth will also serve to control the tree's height below the rooftop level.

Yours Faithfully

A handwritten signature in black ink, appearing to read 'Lachlan McNab', with a long horizontal stroke extending to the right.
