

N.S.W. Government Major Projects

Submission regarding Monahan College

First & foremost my objection to this proposal is the problems it will cause to roads & traffic.

Catherine Field Rd, Chisholm Rd, Springfield Rd, Deepfields Rd, Barry Ave and Anthony Rd (with causeway) were not designed as high traffic roads, and are now being used as short cuts for the new estates. They are full of potholes that reappear as soon as they are filled. They cannot be sustained. The extra traffic delivering and picking up more than 1500 students at all hours, morning and night, according to the proposed operating hours is untenable. Constant noise and pollution for surrounding neighbours.

As there is no drainage or sewer infrastructure in Catherine Field, it must cause pollution and flooding to roads and surrounding areas.

Our area is not the place for this development.
I have not made any political donations
