Planning and Assessment
Department of Planning and Environment
Locked Bag 5022 Parramatta NSW 2124

24th July 2022

Application Number: SSD-30759158

I request that my private information, [REDACTED]
not be disclosed.

I declare I have not made any reportable political donations.

I would like to OPPOSE the proposed Minarah College.

Reasons being is that this is a rural setting and the operations of the school over the weekend will detrimentally effect our amenity and the quiet nature of our local community when we are at home after the busy working week. The noise and traffic created is not in keeping with our neighbourhood character.

Our roads will not cope with the operational traffic of students and staff arriving and leaving the college, as the roads are already riddled with pot holes and narrow in nature, should any traffic accident or incident occur the roads are all single lane in this area and will create traffic problems for the community.

The water runoff from our rural community into our road side embankments has failed us in not being adequate for years, the addition of these college buildings, internal access roads and pathways will add to this problem.

The truck access for all the years involved with the proposed building of the college will not be appreciated, the noise and wear and tear to our roads would be unacceptable and far removed from the peaceful nature of our community.

I moved to Catherine Field over ten years ago, have brought up my children in a road safe and peaceful rural community, i wish to take care of future grandchildren on our property under the same environment, the college proposal is against this happening for me and so i cannot support it and request that your office does the same.
