

Mrs Rosemary Lewis

19 Military Road
Port Kembla
NSW 2505

Attention Director
Industry Assessments, Development Assessment,
Department of Planning and Environment.

3/8/2022

Subject-- Application No. 33042483
Mannildra-- Port Kembla Bulk Liquid Terminal

Dear Director.

I refer to the above Application and the Attached documents and Maps of the proposed routes sent to me by your department, and wish to make the following comments.

The route maps shown for the proposed transport of the Liquid to the proposed Terminal show that the M1 motorway will be used to carry it and leave the M1 at the Five Island Road Exit then proceed along the Five Island Road to Port Kembla exiting at Flinders road and entering the Port area by using this route it avoids residential areas.

My concern is the use of Darcy road Port Kembla also shown on maps as a route for entering and exiting the Port Area from Military road Port Kembla the use of this Route will pass Residential Properties situated on the Western side of Military Road and gives me grave concern in regard to the increased noise level this will cause adding to the existing noise the residents suffer now.

In my view the use of Flinders Road for Entering and Exiting the Proposed Site should be the only route proposed, using this road and Five Island Road to return to the M1 motorway avoids any Residential properties passing only Industrial sites only.

I request that you give my views favourable consideration.

Yours sincerely Rosemary Lewis
