I object to Tilt – Liverpool Range Wind farm submission – Mod 1 Turbine and infrastructure changes

Comments:

- I object to the turbine and infrastructure changes to the Liverpool Range Wind Farm on the following -*
- the changes in height make the project way to industrial*
 - The visability of the windfarm by the rest of the community is totally unacceptable.*
 - The environmental damage and enviromental changes necessary to construct the windfarm.*

are total vandalism on our local fauna and flora.

- Our local soils are very unique. Disturbance to soil causes astronomical erosion which then adds to flooding and explosion in noxious weeds. Farmers in our area have spent millions of dollars to preserve soil and defend our country of noxious weeds.

- This is an industrial invasion of our area and there is nothing "Green" about the project.

- I object to the changes on the grounds also that ^{effective} community consultation has been zero. It has taken local people on their own time to inform the community that these changes were even taking place.
