I **object** to Tilt - Liverpool Range Wind farm submission - Mod 1 Turbine and infrastructure changes

Comments:

I personally do NOT WANT ANY Wind Farm development at Coolah or around my area as I came here in 2012 because I loved to live in a clean farm community free of pollution, and noise that I had in the city. Coolah is visually a beautiful scenic place & all around for 100kms or more is perfect too. The impact of hundreds of Turbines 250mts above mountain tops will be an isore and totally destroy our area. Our roads are atrocious now from weather events, erosion and we wait years for Council to get funds to fix. Our roads can't take the excess truck traffic & destruction & accidents. We struggle to keep a doctor in town at the best of time. Our hospital relies on locum doctors most times. The destruction of endangered Box Gums to build more roo and destruction of prime farmland is NOT ON. I am an original dairy farmer & the rich black soil of Coolah and surrounds is priceless.

continued Page 2

Our town has many bird species and these turbines are a huge danger to all birds. Therefore birds come first before your Wind Turbines which you can take them and shove up your backside. There are too many things that will be detrimental to my community of a quiet country town where I can walk up the street without having traffic 40 times what I have now. If I wanted trucks and F.I.F.O workers lites etc I could have stayed in Newcastle or Sydney. The noise of the Turbines will impact residents peace + quiet and sleep. These are going to be only about 3-5 kms from peoples homes for those living on farms. The kangaroos + wildlife will be impacted by the noise too + more road kill and accidents where they get scared + run out onto roads will happen

Children at school, at home studying will be impacted by the noise of the turbines.

All the electricity transmission towers will be also a huge impact on the countryside, as well as impacting on the already difficult Radio reception which already needs an aerial to get anything.

Also TV reception will be difficult with all the electrical interference.

Our internet and phone (mobile) reception is dodgy in town + almost non-existent not far out of town so thats important to me and a NO TURBINES from me.

The town I cant see will benefit much at all. Yes you will give the Community a few dollars but that wont compensate for all the change and impact on the visual aspect we all love and dont want to loose.

Your WIND TURBINES + Transmission Towers will DESTROY totally the township.

In 25yrs these things will be scrapped + that too big a cost for this town. Put them out to SEA. Thats the new thing. Not on land NEVER.
Thanks Susan Kelly
