

Re: SSD-6696-Mod-1 Liverpool Range Wind Farm Modification 1

I declare I have not made any reportable political donations in the last two years.

I acknowledge and accept the Department of Planning and Environment's disclaimer and declaration

Name: IRENE BARBARA VAN DEINSEN

Address: 145 BINNIA STREET

COOLAH NSW 2843

I OBJECT to the modification of the Liverpool Range Wind Farm for the following reasons:

- ① Visual Pollution - as the towers proposed now are much higher they will be impacting on the views from the town and surrounds much more
- ② Noise Pollution: the noise from the turbines will have an impact on the health of locals
- ③ Environmental: the concrete block will remain in the ground indefinitely. Habitat destruction for wildlife will be a major factor, especially for our beautiful wedgetail eagles, at the new

height proposed. Many of our ^{larger} birds will be impacted as will our native bats.

④ Impact on roads: Longer blades, heavier towers will mean more damage to our already fragile road system

⑤ Putting one in our National Park will destroy the fragile eco system as the new towers will be so high and noisy

⑥ Many areas of farmland will become unusable because the noise from the much larger Turbines will make it impossible to run animals in the area. And the extra land needed for the cement pads will mean the land can't be farmed.

⑦

I am very concerned about the affect of
noise and infra sound on my husband who
has clementia. I would like this to
adddressed.
