(Personal details to be withheld)

I am lodging an objection to Woodlawn ARC (SSD-21184278).

I do not need to declare any reportable political donations made in the last two years

I accept the Department's disclaimer and declaration

Objection:

Veolia breaches its licence conditions regularly. Licence conditions are the legal requirements the government and EPA put in place to keep communities safe.

Veolia has been contaminating the groundwater at their facility for more than 6 years. They were breached for this just 2 days before their incinerator EIS was released.

Veolia uses 'commercial-in-confidence' privileges to hide information that impacts upon community safety and wellbeing.

Veolia's incinerator will produce millions of tonnes of contaminated ash and hazardous waste. They plan to pump contaminated leachate overflow into the same dam that has been leaking for more than 6 years.

The EPA is unable to ensure Veolia complies with the law. Despite regular fines and cautions for odour and other pollution, Veolia continues to breach its licence conditions.

Veolia's failure to protect the environment and local communities is engrained in its worldwide operations. A quick google search demonstrates problems from asbestos contamination in Sydney through to water contamination in the USA and offensive odours.
