I am lodging an objection to the proposed incinerator at Woodlawn, Tarago

* i have not made any reportable political donations in the last two years

I accept the Department's disclaimer and declaration

I object to the proposed incinerator as it has the potential to impact a large swathe of area including Bywong. Properties in the area live off tankwater and spend a lot of time outside on their properties. There is a potential for fine particles to land on our properties and enter our water.

ACT govt has banned a similar project for its impact on the surrounds.

If there was no risk of particles floating in the air it could be built closer to Sydney where the waste comes from.

There is no guarantee of what kind of particles the incinerator will emit and its potential impact on waterways and flora and fauna.

Regards
