Please see attached submission which includes all the personally identifying information that I do not wish to be published.

An identical submission, with no personally identifying information, is below.

Dear NSW Planning,

Hello, my name is Kathleen.

I live in Wamboin NSW.

I am writing with respect to the proposed Tarago Incinerator. I strongly object to this incinerator being built in Tarago.

My family settled in Wamboin approximately 7 years ago. Our primary reason for moving was the quality of life. In particular, the clean air, water and soil. We value the healthful lifestyle we have out here.

We collect all our own water. We grow food for our family. We spend multiple hours a day living with doors and windows open to the outside.

From our front paddock, we can see the wind turbines near Tarago. We are very concerned that the pollution from Tarago's proposed incinerator will drift towards us, causing pollution in our drinking water and air, and contamination of our home-grown food.

We understand that NSW Govt has banned toxic waste incinerators being built near Sydney because of human health impacts. I do not want an incinerator to be built near our home either, for the same reasons.

Please consider this objection to the proposed Tarago incinerator, application number Woodlawn ARC: SSD-21184278.

No political donations have been made in the last two years.

I acknowledge and accept the Department's disclaimer and declaration.

Kind regards,

Kathleen
