

Industry Assessments at Planning NSW,

My name is Tanya Corner. I am a farmer, a parent and resident living in Gundaroo, NSW.

I strongly object to Veolia's proposed incinerator being built in Tarago.

There are many reasons for my objection because I believe that Veolia's toxic industrial waste incinerator will contaminate my farmland, livestock, home grown food, tank water and dams.

I am also concerned about the impact on the health of my family, neighbours and friends. And I don't want to be breathing in toxins from rubbish.

These concerns are important to me because my family moved to the outskirts of Gundaroo for the clean living lifestyle and to create a productive and working farm that was free from toxic pollution.

We are working towards a farm organic certification. The incinerator at Tarago will negatively impact our ability to obtain this certification with the toxic air pollution that it will emit all day, every day, 365 days per year and will spread to our property.

I strongly object to Veolia's proposed incinerator being built in Tarago.

Regards,

Tanya Corner
