

I object to the below incinerator being built:  
Woodlawn ARC SSD-21184278.

I believe the scientific evidence that I have seen indicating that air quality at my home will be negatively impacted with toxins. Further, I believe that my young childrens health will be significantly negatively impacted by toxic particles falling on our soil where I grow all our food organically, on our roof where I collect our drinking water and accumulating in our animals bodies which we raise for meat.

I am incredibly disappointed to see that incineration rejected by Sydney's population is now being targeted onto smaller regional communities with so few population and voice. Disgusting.

I acknowledge and accept the departments disclaimer and declaration.
