

I Sinéad McCann live in 217 Bundong Lane Lake Bathurst. I strongly object to Veolias proposed incinerator being built in Tarago.

I believe that Veolias toxic industrial waste incinerator will impact the flora and fauna environment in such negative ways that we may never have what we have today for our future generations.

I have every single right to have clean air and I don't believe I will if the incinerator is built.

I believe it will be a monumental mistake that will negatively impact the community and surrounds for generations come for health reasons.

I have not made a reportable political donation.

I acknowledge and accept the Departments disclaimer and declaration.
