

I've had issues with sending my submission to the WOODLAWN ADVANCED ENERGY RECOVERY CENTRE (SSD-21184278) The portal customer support team have advised I submit my submission for the proposed project via this email address as the portal is not currently working.

Please withhold my name and personal data from this submission.

-----

I strongly object to the Woodlawn Advanced Energy Recovery Centre as I believe it will impact the health of residents and animals in the surrounding area.

The projected drift of toxic fumes over the surrounding region of Tarago will impact not only private residences but also farmland which makes up a substantial portion of the land. The toxic fumes introduced to crops and animals used for consumption will be detrimental to not only local communities but also the communities to which the food is sold to. This project unnecessarily risks countless humans and animals health.
