

Mrs Julie Hayes  
39 Joshua Street  
Goulburn NSW 2580

I wish to object to the proposed construction of the waste incinerator in Tarago.

My objection is based on the following reasons;

1. The waste to be incinerated comes from Sydney. It should therefore be the responsibility of authorities in Sydney to dispose of this waste in Sydney.
2. If the incinerator technology is safe then the waste should be incinerated in Sydney where it originates. If it isn't safe to incinerate waste in this way, then it should not be burned anywhere, including Tarago.
3. Tarago is surrounded by prime agricultural land. The fallout from the incinerator will pollute and contaminate agricultural land and water supplies so that agricultural activities will become unviable.
4. Depending on the direction of the wind nanoparticle contamination will blow over a wide area including the ACT (where this technology is banned), Goulburn, Braidwood and Bungendore. Bungonia Gorge will also be affected. This is the headwaters of the Shoalhaven River which feeds into Sydney's water supply.

I have made no political donations.

I acknowledge and accept the Department's disclaimer and declaration.

Mrs J. Hayes
