

Dear sir/madam. I strongly object to the Veolia Waste to energy proposal . The winds in Eastern Australia are predominantly westerlies and especially south westerlies for at least 80% of the year - directly from the site onto Tarago. Veolia may be able to reduce particulate matter by no company in the world has ever reduced the stink. Reports are legion to this effect. Serious health concerns demand the precautionary principle, as touted by the WHO, must be paramount. This dangerous and truly stupid proposal must be rejected outright. I have tried to lodge this objection many times on your planning site but cannot get past the declaration to submit. This is unacceptable. I have never made a donation to any political party. I have read the Departments disclaimer and declaration. Thank you. William Hoorweg 119 Taylors Creek Road Tarago, NSW 2580. 0457193366
