

Hello. My name is Jonah and I am a 23-year-old resident of Gundaroo.

I vehemently oppose Veolia's proposed construction of an incinerator (or "Energy Recovery Centre") in Tarago.

I will not bore you with too many details about the hazards of this project. The medium and long-term danger is obvious to anyone who looks honestly at the evidence.

I will just say the following:

**I want to have children.**

**I want to grow food.**

**I want the food I grow to not poison my children.**

Please listen to us; the community.

Do not underestimate the value of investing in our goodwill.

Do not underestimate the cost of putting toxins into our landbase.

You can be assured that opposition to this project will continue many years into the future, even if it goes ahead.

**The health of our children is not negotiable.**

Regards,  
Jonah Myers
