

I wish to OBJECT to the above application

My family lives in Tarago and I am concerned for their health, livelihood and wellbeing. I am concerned for the air they will have no choice but to breathe, the water they will have to drink and the foods they grow that they will eat. Why should their lives be impacted in any way shape or form when dealing with Sydney's rubbish.

A rural area with a smaller voting population should not be the answer to Sydney's waste problem. The vote of this community is just as important as the vote of a person in Sydney. Show this community and those in the other areas you are forcing these incinerators upon that they count and ban incinerators all together for the good of our state.

I have not made a reportable political donation.

I acknowledge and accept the Department's disclaimer and declaration.
