

Hi

I write to you today to lodge my objections to the proposed incinerator at Tarago (Woodlawn ARC: SSD-21184278) for the following reasons:

- *the potential for the impacts on our wine industry (through potential smoke taint),
- *other agricultural industries such as grain & meat (particularly those that rely on export markets that have strict chemical residue thresholds)
- * the flow on effects to regional economies and tourism if those industries are impacted.
- *the uncertainty of the effects on our food and water supply particularly as a rural resident I rely on rainwater and need complete assurance that pollution from the incinerator won't accumulate to dangerous levels on our roofs and in our tanks.

I declare I have no political donations in the last two years.

I acknowledge and accept the Department's disclaimer and declaration.

Regards

Catherine Brown
