

My name is Fiona Wile and I live in Tarago NSW.

I strongly object to Veolia's proposed incinerator being built in Tarago.

I am concerned for the health and wellbeing of myself and my family and my neighbours as a result of pollution from the incinerator. I do not want heavy metals and poisonous gases being released into our home environment. My family chose to live on the land because of the fresh air and lack of pollution compared with cities and it is not fair for this incinerator to undermine this.

I am also concerned about the effect on property value that this will have. Who will want to buy land surrounding a rubbish incinerator? The effect on land values will affect our mortgages and reduce the ability to sell at market value.

If the incinerator is processing Sydney waste then out the incinerator in Sydney...why ruin our little farming town. The fact that the proposal for a Sydney incinerator was refused indicates there are valid concerns regarding the harmful effects the pollution will have on the people and the land.

I have already lost loved ones to cancer and I do not need my family exposed to pollution which will increase the chance of them getting cancer. It is unethical of a company (Veolia) to put their profits before the health and wellbeing of a community.

I have read the NSW Government guide on political donation and gift disclosure and understand my obligations.

I confirm I have NOT made any donations or gifts.

Regards

Fiona
