

To whom it may concern.

Re Woodlawn ARC:SSD-21184278

I wish to object to the waste to energy incinerator being built in our Goulburn district. Most people who choose to live in country areas, as opposed to cities, do so because of the lack of pollution and the healthier atmosphere in which to raise their children. As someone who grows my own vegetables and fruit organically, it is very important to me not to have the air around my garden polluted.

In building the incinerator in our district our clean air and healthy lifestyle are being threatened. Scientific research shows that the pollution which will be created by this incinerator will be harmful to health, local agriculture and future generations.

I have not made any reportable political donations in the last two years.

I acknowledge and accept the Department's disclaimer and declaration.

Yours faithfully,  
Kim Wilson
