

I wish to OBJECT to the above application

Tarago is my family's home and has been my whole life. My Dad grew up here, I grew up here and now I am choosing for my children to grow up here. It is a lovely small town where people care about each other and everyone practically knows everyone.

I wish to OBJECT to the proposed incinerator as the impacts on the town and the people I call my family and friends will be detrimental, and I can't imagine living anywhere else.

Along with the incinerator impacting on those nearest and dearest to me what will the lasting health effects be to these people? Some of whom are cancer survivors, some have autoimmune diseases and some are still growing and developing. How can you guarantee that the emissions from the incinerator won't impact on the health of the people of the town and surrounding areas? What about the mental health of my family and friends who have to live with the constant worry and concern about the quality of the air they breathe, water they drink and wash in and vegetables and eggs they grow and eat? When will people be put before profits?

Not only do I live locally but I also work in Tarago Village. What sort of job certainty will I have if people stop moving to this area? Why should my health and career be sacrificed so Sydney's rubbish can be put out of mind and out of sight from Sydney. This proposed project affects me and so many others in more ways than one and shouldn't be permitted to proceed.

There has to be a safer option.

I have not made a reportable political donation.

I acknowledge and accept the Department's disclaimer and declaration.
